FIA EXPO

NOVEMBER 2-4, 2026 | CHICAGO

Expo Program 2026

Monday, November 2

9:30 a.m. - 10:45 a.m.

Markets Academy: Evolution of Futures Markets

Explore how futures markets have evolved into a critical component of the global financial system. This introductory session provides a foundational understanding of how futures markets operate, how they differ from other financial markets, and the essential role they play in price discovery and risk management. Participants will learn the key components of a futures contract, the market infrastructure that supports trading and clearing, and the diverse participants who drive market activity. By the end of the session, attendees will have a clear understanding of how futures markets function and their importance to the global economy.

Speaker

Jim Overdahl, Partner, Delta Strategy Group

10:00 a.m. - 10:45 a.m.

Prediction Markets Academy: The Rise of Prediction Markets

Prediction markets have expanded rapidly in the United States, fueled by growing interest in event-based contracts on everything from elections and economic indicators to sports and entertainment. This session will explore the evolution of prediction markets, the key players shaping the market, factors driving their growth, and the significant increase in trading activity and participant engagement. This session will set the stage for later sessions by describing some of the unique legal, regulatory, and operational questions these markets are raising.

Speakers

Will Acworth, Global Head of Market Intelligence, FIA
Bethany Vodicka, Independent Trader

11:00 a.m. - 12:15 p.m.

Markets Academy: Clearing: Safeguards for the Futures Market

This session explores the essential role of clearing, focusing on how it mitigates counterparty risk, ensures the integrity of trades, and protects customer assets. Participants will gain a clear understanding of the clearing process for listed derivatives-from trade execution to final customer statement. The session will conclude with a forward-looking discussion on emerging trends in clearing, including digital asset products and the evolving landscape of U.S. Treasury clearing.

Speaker

John P. Davidson, Principal, Pirnie Advisory, LLC

11:00 a.m. - 11:45 a.m.

Prediction Markets Academy: Market Structure and Product Design

Event contracts share some similarities with traditional futures products, but they introduce a distinct set of market structure, product design, and operational questions. This session will explore the unique characteristics of prediction market contracts, including binary outcomes, event-based settlement, contract listing practices, liquidity formation, and expiration dynamics. Topics also include the role of market makers and intermediaries, and the challenges associated with pricing, risk management, and settlement. The session will also examine issues that are less common-or entirely absent-in traditional futures markets, such as defining and verifying event outcomes, managing information asymmetries, handling contract disputes, and designing markets around highly anticipated or potentially controversial events.

Speakers

Ian Grieves, Chief Product Officer, Rothera
Huan Zhang, President & Chief Risk Officer, Nodal Clear

Expo Program 2026

11:00 a.m. - 5:00 p.m.

Registration Open

12:00 p.m. - 2:00 p.m.

Retail Roundtable (Closed event)

1:00 p.m. - 1:45 p.m.

Prediction Markets Academy: Applying Futures Market Safeguards to Prediction Markets

Can traditional futures market safeguards be successfully applied to prediction markets? This session will examine the core safeguards that have helped make futures markets resilient. Our speaker will explore whether these structures are appropriate for prediction markets, how they might need to be adapted, and the tradeoffs between the traditional futures model and emerging direct-clearing member approach. The discussion will consider questions surrounding leverage, customer protection, segregation of funds, capital requirements, clearing arrangements, and the role of intermediaries.

Speakers

Sudhir Jain, Chief Compliance Officer and Head of Regulatory Affairs, Kalshi
Michael O'Callaghan, Managing Director, Wedbush

1:15 p.m. - 2:30 p.m.

Markets Academy: A Technologist's Guide to the Futures Market

This course connects technology requirements to real-world market structure to help tech professionals make more informed design decisions, communicate more effectively with business stakeholders, and better understand the industry their systems serve. Topics include trading versus clearing, connectivity and market data, system integrations, settlement cycles, operational dependencies, and critical points of risk.

Speaker

Danny Gomez, Founder & Principal, Colectivo

2:00 p.m. - 2:45 p.m.

Prediction Markets Academy: DCM/DCO Oversight: Insider Trading & MNPI

This session will explore how core DCM and DCO oversight responsibilities are being applied to prediction markets, including the detection and investigation of potential market manipulation, misuse of material nonpublic information (MNPI), and insider trading concerns. Panelists will examine real-world examples and discuss how prediction market operators are adapting surveillance frameworks traditionally used in futures markets to address the unique characteristics of event contracts. The discussion will also explore the challenges of monitoring markets where outcomes may be influenced by individuals with privileged access to information, the role of self-regulatory and exchange surveillance programs, and the technologies and processes being deployed to identify suspicious trading activity.

Speakers

Jay Biondo, Head of Product & Regulatory Affairs, Eventus
Julian Hammar, Partner, Pierson Ferdinand

Expo Program 2026

2:30 p.m. - 5:00 p.m.

Buyside Summit (Invite Only)

2:45 p.m. - 4:00 p.m.

Markets Academy: Understanding & Avoiding Spoofing Behavior

Preventing market manipulation remains a top priority for exchanges and regulators, with spoofing among the most closely scrutinized trading practices. This session explains what constitutes spoofing, how regulators distinguish spoofing from legitimate trading activity, and the factors commonly considered when evaluating trader intent. Drawing on regulatory guidance and recent enforcement actions, participants will explore real-world examples, learn how spoofing behavior is detected, and identify practical steps firms and market participants can take to reduce compliance risk and promote market integrity.

Speakers

Thomas Krebs, Partner, Foley & Lardner
Ellen Wheeler, Partner, Foley & Lardner

3:00 p.m. - 3:45 p.m.

Prediction Markets Academy: Institutional Adoption

Prediction markets have captured significant attention from retail traders-but can they gain traction with institutional investors? As trading volumes grow and market infrastructure continues to evolve, many market participants are asking whether prediction markets can become a meaningful tool for hedging, risk management, price discovery, or portfolio diversification. This session will examine the current state of institutional participation in prediction markets and explore what may be needed to attract a broader range of professional investors. Panelists will discuss the perspectives of hedge funds, proprietary trading firms, asset managers, market makers, and other institutional participants, and consider whether event contracts offer unique investment opportunities that are not available in traditional futures and options markets. The discussion will also explore the practical hurdles to institutional adoption, including liquidity, clearing arrangements, counterparty risk, regulatory certainty, compliance considerations, and operational infrastructure.

Speakers

Will Acworth, Global Head of Market Intelligence, FIA
John Conlon, Director, Greenlight Commodities

FFK Kilt Challenge 2027 Kickoff Walk

Walk with purpose: kick off your Expo morning along the Chicago Riverwalk in support of Futures for Kids (FFK). Join Julie Winkler, Chief Commercial Officer of CME Group, who is kicking off her 2027 Futures for Kids Kilt Challenge with an early-morning walk. Julie and David Martin of G.H. Financials took up the sporran at last year's IDX Gala, and this is the first event of their year-long campaign, Global Miles, Brighter Futures.

Every mile helps FFK support charities that give disadvantaged children and young people around the world access to education and opportunity.

Space is limited to 50 walkers, so please register in advance. A minimum donation of $25 to the Kilt Challenge reserves your place, and each walker gets an FFK hat for the November chill. Walkers will meet at the Sheraton Grand Chicago Riverwalk's convention center entrance at 6:45 a.m. and step off at 7:00 a.m. You'll be back in time for coffee before the 9:00 a.m. program begins.

Perp Talk: Your Game Plan for Market Integrity in 24/7 Perpetual Futures

Sponsored by Solidus Labs.

Perpetual futures have grown rapidly on both US-regulated DCMs and offshore exchanges. Imported from crypto markets, this product offers round-the-clock trading and price exposure to assets from crude oil to US equities, with no expiry, roll, or physical delivery. Periodic funding payments between longs and shorts, rather than a dated contract's convergence, keep prices anchored to the underlying. This session explores the rise of perpetual futures on Hyperliquid and the market integrity risks that come with this product and the market structure around the venues where it trades. A case study of oil perpetuals over the weekend of March 8-9, 2025, when CME was closed, shows how price formation, spoofing patterns, and momentum ignition play out when the reference market is dark.

Speaker

Spyridon Antonopoulos, SVP and Global Head of Government, Services, and Investigations, Solidus Labs
